PROJECT SUN STREAK (U)

Session Procedures Report

FORMAT

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

Control Number: 'H'

Nicknames:

Date of Session: 2 OCT 86

Target Country:

References:

Session Number: CRV-2

Date of Report: 2 OCT 86

Mission Status:

Technique Utilized: CRV

Source Identifier: RV-003

1. (S/NF/SK) TASKING: (SEE ATTACHED TARGET INFO) Monitor was informed that problem. (in addition to attached questions) would entail a target search for a MATRIX point (or points) at the intersection of 'Area 1 and Area 2'. Monitor was also informed that Area #2 was different than MATRIX #1 and that it was located (relative) to the Southwest.
2. (S/NF/SK) SESSION: Monitor first-loaded with CRV-1 and ORS OFFICER feedback. Source was ~~asked~~ asked if he recalled the ~~mission~~ ^{site} ~~that~~ that he worked last session, (He did), and then shown the "working diagram" (see last page of CRV-2) which labeled Area 1 as a military compound and displayed area 2 in the lower left corner of the paper. ~~After a short description~~ He was then instructed to view Area 2, not Area 1. After a short description of area 2, source began to lose interest in the site since it seemed to offer no novelty ~~as well as a time line search~~ ^{area 2 conditions then read.} Monitor then told source that the Areas 1 & 2 were connected in some way and that his new target would be this 'matrix' intersection. Source was then instructed to scan both areas (on paper) with his left hand and to perceive the relationships which would answer the "intel question".

'H' CRV-2 RV-003 2 OCT 86 (CONT)

3. (S/NF/SK) Summary: Area 2 was perceived by source as having a definite "run down" feeling. Buildings (green colours) were present; paint peeling. Area is humid; exhaust fumes present. Several different types of structures present.

Connected in some way with both areas are the following ideas:

- a "VIP" who does not wish this "involvement" to become common knowledge.
- a large, voluminous building (poss. a warehouse)
- Technical equipment in crates, also weapons, stockpile
- military involvement

The 7 key connector seemed to be a piece of "hi-tech" equipment.

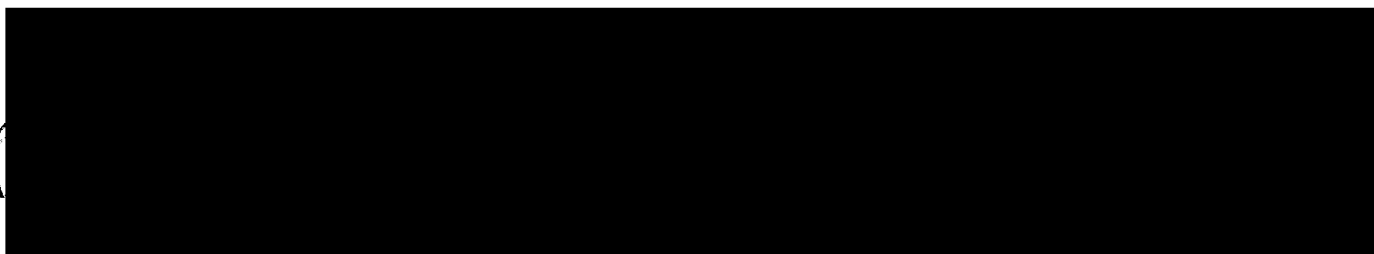

4. (S/NF/SK) Feedback: Source inquired how much monitor knew re. sites. Answer was that sites were connected in some way in the matrix and that the "interaction" was probably our ultimate target.

Utility Assessment "H"

This will be a multi session, progressive collection effort.

HLs

59k ~~see~~ one area knows this is going on, the
other one doesn't

Site is an area of buildings + land, ~~set~~ slightly hilly w/ trees + humid + sunny + warm. Some bldgs are old, w/ flaking paint - reminiscent of old areas of Ft. Leonard wooden Ft. Meade. Site is connected in some way with "Site 1" and involved the relationships of certain from one site with people from the other over a finite period of time. At least one person seen to be high-ranking + powerful, but doesn't want it common knowledge he's involved. Sense of equipment - computers, hi-tech, electronic type - bldgs stored in secret away.
